

# Cola Bottle Crate Injection Mould

This high-precision injection mould is designed for manufacturing cola bottle crates. The mould is engineered for efficient production and durability, ensuring consistent quality and dimensional accuracy of the final product.

## Product Overview

### High-Precision Injection Moulding Solution

This high-precision injection mould is engineered specifically for the efficient, high-volume manufacturing of cola bottle crates. Designed for durability and consistent quality, the mould ensures dimensional accuracy in every cycle. It features robust construction and optimized cooling channels, which significantly reduce cycle times to maximize production output.

## Technical Specifications

Cavity Configuration	20 cavities
Key Features	High-Precision, Optimized Cooling, High-Volume Production, Dimensional Accuracy

## Performance Metrics

### Cycle Time Optimization

**1 Optimized**

Cooling System

**20 Cavities**
