

Cold Press Juicer for Fruits and Vegetables

This cold press juicer extracts maximum juice yield from various fruits and vegetables. It utilizes a slow squeezing mechanism to minimize oxidation and preserve essential nutrients.

Product Overview

Efficient Cold Press Extraction

This compact cold press juicer is engineered to maximize juice yield while minimizing oxidation, ensuring that vital nutrients are preserved in every glass. Designed with a slow-squeezing mechanism and a durable auger, it efficiently processes both fruits and vegetables. The unit is constructed with BPA-free materials, making it a safe and reliable choice for health-conscious environments.

Technical Specifications

Material Safety

BPA-Free

Key Features

- Slow squeezing mechanism for nutrient preservation
- Durable auger for high efficiency
- Fine mesh filter for smooth juice consistency
- Easy disassembly for cleaning

Design & Usability

Design Benefits

Compact Design, Easy to Clean, Separate Juice/Pulp Collection
