Overview

Cold Chain Logistics Solutions

These professional cold storage trucks are engineered to provide reliable temperature-controlled transportation for perishable goods. Utilizing advanced chassis technology, they feature insulated cargo boxes designed to maintain consistent thermal environments during transit. With a wide range of models available, they offer versatile payload capacities and internal dimensions to support everything from local logistics to long-distance distribution.

Features

Design Highlights

Waterproof reinforcement layer, Dual-side cooling front board, Thermal insulation door frame, Ergonomic sloped door design, Stainless steel side door cladding

Specifications

Vehicle Model Specifications

Model	Gross Vehicle Weight (kg)	Typical Payload (kg)
YJM5040XYY	4495	3250
YJM5180XLC6	18000	9995
YJM5310XLC6	31000	17225
YJM9401XLC	40000	30800

Compatible Chassis Technology

- FAW
- Dongfeng
- Foton
- JAC
- Sinotruk
