

Collapsible Reflective Warning Triangle for Roadside Safety

This portable reflective warning triangle is designed for roadside safety. It features a collapsible triangular reflector with a bright red surface and a supporting base for stable placement.

Product Overview

Roadside Safety Essentials

This professional-grade collapsible warning triangle is engineered for maximum visibility during roadside emergencies. Its high-reflectivity surface ensures oncoming traffic can easily identify stationary vehicles, significantly reducing the risk of secondary accidents. Designed for portability and ease of use, the unit features a sturdy base for stable placement on diverse road surfaces.

Key Features

Safety Standards

High Visibility, Reflective Surface, Collapsible Design, Emergency Equipment

Physical Attributes

Build Design

Collapsible folding mechanism for compact storage

Support Mechanism

Integrated supporting base for stable placement
