

Collapsible Wire Mesh Container for Agricultural Products

This collapsible wire mesh container is designed for storing and transporting agricultural products. It features a robust metal frame and wire mesh structure, ensuring ventilation and visibility.

Product Overview

Efficient Agricultural Storage Solution

This collapsible wire mesh container is purpose-built for the storage and transportation of agricultural products such as fruits and vegetables. Its robust metal frame and wire mesh construction ensure optimal ventilation and product visibility while maintaining structural integrity. Designed for logistics efficiency, the unit features a solid base and integrated forklift pockets for seamless handling across your supply chain.

Design & Construction

Structure Type	Collapsible Wire Mesh
Material Features	Robust Metal Frame, Wire Mesh, Solid Base

Logistics & Handling

Handling Features

Forklift Compatible • Collapsible • Ventilated

Primary Application

- Fruit storage
- Vegetable storage
- Agricultural transportation
