

Collated Strip Nails for Pneumatic Nail Guns

Collated strip nails are designed for use in pneumatic nail guns. The nails are held together by a strip, which enables rapid fastening in construction and woodworking.

Product Overview

High-Performance Collated Strip Nails

These professional-grade collated strip nails are engineered for seamless integration with pneumatic nail guns. Featuring a robust collation design, they ensure smooth feeding through the tool, significantly reducing the risk of jamming on the job site. Built for reliability and efficiency, these nails are an ideal choice for high-volume construction, framing, and sheathing tasks requiring consistent performance.

Technical Specifications

Key Advantages

- Rapid fastening capability
- Minimized tool jamming
- Increased job site productivity
- Consistent feed performance

Primary Applications

Framing, Sheathing, Woodworking, General Construction

Compatibility

Designed for all standard pneumatic nail guns

Collation Method

Adhesive or wire strip
