

# Color-Coded Architectural Scale Ruler

This high-precision architectural scale ruler is designed for professional use. It features multiple scales for accurate measurements in architectural drawings and blueprints.

## Product Overview

### Professional Architectural Scale Ruler

This professional-grade architectural scale ruler is an essential tool for architects, engineers, and designers requiring high-precision measurements. Featuring a unique three-color strip design, it allows users to quickly identify and switch between various measurement scales during complex drafting tasks. Its durable construction ensures longevity in demanding work environments, making it a reliable companion for both blueprint analysis and architectural design work.

## Technical Specifications

### Available Scales

- 1/8"=1'-0"
- 1/4"=1'-0"
- 1/2"=1'-0"
- 3/4"=1'-0"
- 1"=1'-0"
- 1 1/2"=1'-0"
- 3"=1'-0"

### Key Features

Color-coded strips, High-precision, Triangular profile, Durable material

## Applications

### Recommended Use

Architectural Drawing • Blueprint Analysis • Professional Design • Engineering Drafting
