

Color Network Surveillance Camera

This high-resolution network camera is designed for surveillance and monitoring applications. It features a robust housing, advanced image processing capabilities, and network connectivity for remote viewing and control.

Overview

Professional Network Surveillance

This high-resolution network gun color camera is engineered for reliable surveillance and monitoring applications. Designed with a robust housing, it ensures durability and performance in diverse environments. The unit offers advanced image processing capabilities and seamless network connectivity, allowing for efficient remote viewing and control.

Technical Specifications

Camera Type	Network Gun Camera
Imaging Mode	Color

Application

Usage Environment	Indoor, Outdoor
-------------------	-----------------

Features

Key Capabilities

- High-resolution imaging
- Advanced image processing
- Network connectivity
- Remote viewing and control
- Robust housing construction
