

Column Array Loudspeaker with Bluetooth and DSP

This loudspeaker system is designed for professional audio applications. It features a modular design with a subwoofer base and a column array speaker for excellent sound coverage and clarity.

Overview

Professional Column Array Sound System

This high-performance column array loudspeaker system is engineered for professional audio applications, combining a powerful 12-inch subwoofer with a modular column array for exceptional sound dispersion. It features integrated DSP sound effects and versatile connectivity options including Bluetooth, TWS, and dedicated inputs for microphones and guitars. Designed for live performances and installations, the system delivers 800W of power with deep bass and articulate high frequencies.
