

Combination Audio Alert Device

This device combines a speaker, trumpet, and buzzer for versatile audio output. It is designed for use in industrial, scientific, or medical settings.

Product Overview

Industrial Audio Alert System

This combination audio alert device is engineered for precise acoustic signaling in demanding industrial, scientific, or medical environments. It integrates versatile audio output capabilities, including speaker, trumpet, and buzzer functions within a single robust unit. The intuitive front panel design provides direct control and monitoring through dedicated power, status, and control indicators.

Control & Interface

User Interface Components

- Integrated display screen
- Tactile control buttons
- Toggle switches
- POWER status indicator
- ERROR status indicator
- READY status indicator
- ON/OFF operational controls

Application

Application Fields

Industrial Automation, Scientific Instrumentation, Medical Equipment, Process Control

Device Features

Audio Output Capabilities

Speaker • Trumpet • Buzzer
