Product Overview

Versatile Grinding Solution

This combination belt and disc grinder is engineered for precise shaping and finishing of wood, metal, and plastic materials. By integrating a linear sanding belt with a dedicated disc sander, it offers exceptional flexibility for both flat surface work and complex curves. Its robust construction and adjustable work tables ensure durability and accuracy, making it an essential tool for professional workshops and hobbyists alike.

Technical Specifications

Grinding Capabilities

- Linear belt grinding
- Disc sanding for flat surfaces
- Contour and curve finishing

Primary Applications

Woodworking, Metalworking, General DIY, Plastic Finishing

Construction & Design

Design Features

- Multi-position belt sanding arm
- Cast iron disc sanding table
- Adjustable work tables for angle grinding
- Robust construction

Build Quality

Durable • Precision-engineered
