

Combination Belt and Disc Sander for Wood and Metal

This combination belt and disc sander is designed for woodworking and metalworking. It features an adjustable work table for precise sanding angles and consistent sanding speed.

Overview

Versatile Sanding Performance

This combination belt and disc sander is engineered for both woodworking and metalworking applications, offering a comprehensive solution for shaping, smoothing, and finishing. The dual-function design allows for efficient sanding of flat surfaces using the belt, while the disc is perfectly suited for managing inside and outside curves with high accuracy. Built with a durable cast aluminium work table that tilts for angled sanding, this tool provides the versatility and precision required for professional results.
