

Combination Induction and Gas Cooktop

This cooktop features both induction and gas cooking surfaces for versatile cooking. It has a stainless steel finish, digital controls, and safety features including automatic shut-off and a child lock.

Overview

Professional Hybrid Cooking Solution

This premium combination cooktop integrates both induction and gas technology to provide unparalleled culinary versatility. Designed for modern professional environments, the unit allows for the rapid precision of electromagnetic heating alongside the traditional tactile control of gas flames. The sleek stainless steel exterior combined with advanced integrated digital safety controls makes this an efficient and reliable addition to any kitchen.
