

Combination Joint Fitting

This combination joint fitting is designed for connecting mechanical parts. It is constructed from durable steel or steel alloy and features a threaded rod with a collapsible anchor for industrial applications.

Product Overview

Professional Combination Joint Fitting

This combination joint fitting is a robust mechanical fastener designed for secure connections in industrial applications. Featuring a long threaded rod and a collapsible anchor mechanism, it provides reliable stability for joining components. Its high-quality metallic construction ensures long-term durability and resistance under stress, making it an ideal choice for professional assembly and construction tasks.

Technical Details

Material	Silver-colored metal (Steel/Steel Alloy)
Fastener Type	Combination Joint Fitting / Toggle Bolt
Key Features	Collapsible Anchor, Threaded Rod, Industrial Grade, High Strength
