

Combination Joint Fittings

These fittings create secure connections in piping systems. They are designed for durability and reliability in plumbing and construction.

Product Overview

Professional Combination Joint Fittings

These high-quality combination joint fittings are designed for seamless integration in modern appliance assemblies. Featuring a robust, metallic construction with a sleek finish, they are engineered for durability and precise fit. The design supports advanced control interfaces, including digital displays and tactile button arrays, making them an ideal choice for premium built-in oven systems.

Technical Specifications

Configuration

Double Compartment • Digital Control Ready

Reference ID	928
Design Features	Metallic Finish, Modern Aesthetic, Dark Glass Interface, High-Precision Engineering
