

# Combination Microwave Oven and Induction Cooktop

This combination appliance integrates a microwave oven and an induction cooktop. It offers versatile cooking options for heating, defrosting, and rapid induction cooking.

## Product Overview

### Precision Sectioning Technology

This automated rotary microtome is a high-precision instrument engineered for creating thin, serial sections of biological specimens for microscopic examination. It features an advanced motorized cutting system with adjustable speed and thickness settings to ensure consistent, reproducible results. Designed for demanding laboratory environments, it includes a versatile specimen holder and an integrated control panel for streamlined operation.

## Technical Capabilities

### Key Features

- Adjustable cutting speed
- Variable section thickness
- Precision specimen holder
- Integrated control panel

<b>Cutting System</b>	Motorized
<b>Primary Applications</b>	Histology, Pathology, Research Laboratories
