

Combination Microwave Oven and Induction Cooktop

This combination appliance features both a microwave oven and an induction cooktop. The induction cooktop has a black ceramic glass surface with a marked cooking zone and a separate control panel.

Overview

Dual-Function Culinary Solution

This versatile kitchen appliance combines the efficiency of a microwave oven with the precision of an induction cooktop in a single, space-saving unit. Designed for modern commercial and residential kitchens, it features a sleek ceramic glass surface and an intuitive digital control interface. This dual-function design optimizes workflow by allowing simultaneous or independent cooking tasks, making it an ideal choice for compact kitchen layouts.
