

# Combination Pliers with Ergonomic Grip

These combination pliers feature precision-machined jaws for gripping, cutting, and bending. They are designed with induction-hardened cutting edges, ergonomic handles, and a corrosion-resistant finish.

## Overview

### Professional Grade Combination Pliers

These high-leverage combination pliers are engineered for precision gripping, cutting, and bending across a variety of materials. Designed with durability in mind, they feature induction-hardened cutting edges to ensure long-lasting performance in demanding environments. The ergonomic handle design minimizes hand fatigue, making them an ideal choice for sustained use in electrical, mechanical, and general-purpose applications.

## Key Features

### Suitable Applications

- Electrical work
- Mechanical assembly
- General-purpose maintenance

### Core Functions

Gripping, Cutting, Bending

## Technical Specifications

### Durability & Finish

Induction-hardened edges • Corrosion-resistant finish

### Design Focus

High-leverage ergonomic design for reduced hand fatigue
