

Combination Pliers with Insulated Grip

These combination pliers are designed for gripping, cutting, and bending various materials. They feature hardened steel jaws for durability and insulated handles for safe use in electrical applications.

Product Overview

Professional Grade Combination Pliers

These German-style combination pliers are engineered for versatility and durability in professional electrical and mechanical environments. Featuring a robust carbon steel construction with a nickel-plated finish, they offer excellent resistance to corrosion and wear. The ergonomic two-color insulated handle ensures both comfort during extended use and essential safety for electrical applications.

Technical Specifications

Plier Style	Germany Type
Overall Length	180 mm

Materials & Construction

Material	Carbon Steel
Surface Finish	Nickel Plated

Features

Handle Design	Insulated • Two-colour
Primary Applications	Gripping, Cutting, Bending, Electrical Work, Mechanical Repair
