

# Combination Square Set with Square, Protractor, and Center Heads

This combination square set features a stainless steel rule with etched metric graduations. The set includes a square head, a protractor head, and a center finding head for versatile measuring.

## Product Overview

### Precision Combination Square Set

This versatile combination square set is an essential tool for precision layout and measurement tasks. It features a durable 300mm stainless steel rule paired with three interchangeable heads: a square head, a protractor head, and a center finding head. Designed for professional use, the set allows for accurate leveling, angle measurement, and center location on round stock.
