

Combination Square Set

This combination square set includes a steel rule with inch and metric graduations, a square head with a spirit level, a protractor head, and a center finding head. It is used for measuring, marking, and checking angles and dimensions in woodworking, metalworking, and other applications.

Overview

Precision Measurement and Layout Tool

This versatile combination square set is an essential tool for woodworking, metalworking, and general construction. It features a durable steel rule with both imperial and metric graduations for precise measurement and marking. The set includes multiple heads—square, protractor, and center finding—allowing professionals to accurately check angles, dimensions, and center points with ease.
