

Combination Table and Mitre Saw

This versatile power tool combines the functionalities of a table saw and a mitre saw. It is designed for precise crosscuts, bevel cuts, and rip cuts in wood and other materials.

Product Overview

Dual-Function Performance

The PXCM218 is a high-performance combination tool designed to serve as both a table saw and a mitre saw. With a robust 1400W motor and variable speed control, it delivers the power and precision required for professional woodworking and construction tasks. The tool features a sturdy aluminum base and safety-focused design, ensuring stability and reliability for a variety of bevel and rip cutting applications.

Technical Specifications

Input Power

1400 W

Power Rating

Voltage/Frequency	230V/50Hz
No-load speed range	2500–4000 rpm
Blade Diameter	250 mm
Cutting Capacity	Left 45 degree

Key Features

Core Features	Dual Function, Safety Switch, Aluminum Base, Variable Speed, TCT Blade
---------------	--

Logistics

20' Container Load	210
