

Combined Electric and Steam Iron with Base Station

This combined electric and steam iron features a compact design with an integrated base station. It is designed for household use, specifically for ironing clothes and fabrics.

Product Overview

Professional Fabric Care Solution

This combined electric and steam iron is designed to deliver efficient wrinkle removal for a variety of fabrics. Featuring an integrated base station with a dedicated steam generator, it provides a consistent steam output for high-quality results. Its compact, ergonomic design with a distinct blue and yellow handle ensures ease of use in both household and light commercial settings.
