

Combined Rice Mill Plant

This rice mill plant is designed for producing high-quality rice. It integrates cleaning, husking, separating, and polishing functions with a compact structure and automated operation.

Overview

Combined Rice Mill Plant

The NZJ15-IAM combined rice mill machine is a comprehensive solution designed for efficient rice processing. It integrates pre-cleaning, stoning, hulling, paddy separation, and whitening into a single compact system. This setup is optimized for small-scale rice millers who require a reliable machine that delivers high cleaning efficiency and bright, high-quality finished rice.

Technical Specifications

Integrated Functions

- Pre-cleaning
- Stoning
- Rice hulling
- Paddy separation
- Rice whitening

Model Number

NZJ15-IAM

Key Features

Key Benefits

Compact Structure • High Milling Yield • Automated Operation • Easy to Operate

Application

Suitable For

Small-scale rice millers, Medium-scale rice processing
