

Combined Rice Milling and Grain Crushing Machine

This combined machine is designed for both rice milling and grain crushing. It features a productivity of 150kg/h for rice milling and 300kg/h for grain crushing.

Productivity: rice milling machine: 150kg/h
Grinder: 300kg/h
Power: 2.2kw
Weight: 47kg

Product Overview

Dual-Function Grain Processing

This versatile combined machine is designed for efficient rice milling and grain crushing in a single, compact unit. It offers high productivity for small to medium-scale agricultural operations, handling both peeling rice and grinding grains like corn and beans. Its robust design, including a sturdy frame and integrated feeding hopper, ensures reliable performance and ease of use for varied processing needs.

Performance Metrics

Operational Throughput

130 kg/h

Rice Milling Output

300 kg/h

Grain Crushing Output

Technical Specifications

Power Requirements	2.2 KW
Machine Dimensions	530 x 470 x 480 mm
Gross Weight	47 KG

Logistics

Packaging	Carton packing
