

Combined Rice Milling Machine

This combined rice milling machine integrates multiple functions into a single unit for efficient rice production. The system is engineered to minimize grain breakage and maximize yield.

ADDITIONAL IMAGES

Overview

Integrated Rice Milling Solution

This combined rice milling machine is a comprehensive processing unit designed to streamline the entire milling workflow. By integrating cleaning, destoning, hulling, paddy separation, and whitening into a single system, it ensures high efficiency and consistent output quality. It is the ideal choice for small-scale rice milling plants looking to optimize space while maintaining superior grain quality.

Integrated Functions

Cleaning Sieve, Destoner, Huller, Paddy Separator, Rice Whitener

Technical Performance

Key Performance Metrics

1500 KG/H
Max Output

70 %
Milled Rice Rate

1320 R/min
Spindle Speed

Power Consumption

29.2 KW

Physical Specifications

Dimensions & Weight

Metric	Value
Weight	1300 KG
Dimensions (L x W x H)	3670 x 2800 x 3300 mm
