

# Combo DVB-S/S2 and DVB-T/T2 Digital Satellite Finder

This digital satellite finder supports DVB-S/S2, DVB-T/T2 standards. It is designed to aid in the alignment and optimization of satellite and terrestrial TV antennas.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Signal Alignment Tool

This professional-grade combo digital satellite finder is designed for precise alignment and optimization of both satellite and terrestrial TV antennas. It supports multiple broadcasting standards including DVB-S/S2 and DVB-T/T2, making it a comprehensive solution for field technicians. The device features an intuitive LCD interface, signal strength indicators, and a built-in compass for efficient directional assistance during installation.

## Technical Specifications

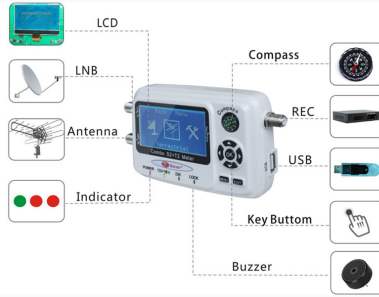

### PACKING AND DELIVERY

Secure industrial packaging ensures the product arrives safely for professional use.

Supported Standards	DVB-S, DVB-S2, DVB-T, DVB-T2
Power Input	18 V
Input Impedance	75 $\Omega$

## Features

The device features a clear LCD screen, directional compass, and dedicated buttons for menu navigation and signal lock status.

### Connectivity & Updates

- USB port for firmware updates
- LNB input
- Antenna input

### Status Indicators

Power • 13V/18V • 22KHz • Lock Status

## Compliance

Verified compliance and certification documents for quality assurance.
