Product Overview

Reliable Combustible Gas Detection

The I1 independent combustible gas alarm is a plug-in safety device designed to detect CH₄ or LPG leakage in household and commercial environments. Featuring a modern, compact design, it provides immediate audible and visual alerts when gas concentrations exceed safe thresholds. This unit operates autonomously, ensuring continuous monitoring for potential gas leaks to enhance safety in kitchens and near gas appliances.

Technical Specifications

Detectable Gases	Natural Gas, LPG
Working Voltage	240 V
Sensor Life	5 years

Performance Metrics

Alarming Level

7 %LEL
Alarm Trigger

Alarm Sound Level	70 dB
-------------------	-------

Operating Environment

Operating Temperature	-20 to 40
Max Humidity	<95% RH
