

Commercial Air Atomizer for Humidity Control

This atomizer is designed to create a fresh and clean air environment, making it suitable for indoor locations. It provides heavy fog output, long-lasting performance, and constant humidity control.

Product Overview

Commercial Humidity Control Solution

This commercial air atomizer is designed to create a fresh and clean indoor environment through heavy, consistent fog output. It provides reliable humidity control, making it an ideal choice for high-traffic indoor locations such as amusement parks, arcade centers, and playgrounds. With intelligent safety features like automatic power-off, this unit delivers both performance and peace of mind for facility operators.

Technical Specifications

Power Consumption	300 W
Voltage	220 V

Performance Metrics

Humidification Rate

2 kg/h

Humidification Output

Atomization Particle Size

5 um

Max Particle Size

Physical Dimensions

Unit Dimensions	640 x 380 x 375 mm
-----------------	--------------------

Logistics

20ft Container Capacity	192 pcs
-------------------------	---------

Applications

Recommended Use Cases	Arcade Game Centers, Indoor Playgrounds, Soft Playgrounds, Amusement Parks
