

Commercial Air Cooling Freezer Showcase

This air cooling freezer showcase is designed for commercial use, providing efficient and reliable refrigeration. It features a glass door for clear visibility and adjustable shelves for flexible storage.

Overview

Professional Commercial Freezer Showcase

This commercial air-cooling freezer showcase is engineered for high-performance retail display, featuring advanced cooling technology to ensure product integrity. With a temperature range of -18°C to -25°C and a robust 70mm insulation layer, it provides efficient, no-frost operation suitable for demanding environments. The unit is designed for maximum visibility and convenience, incorporating anti-condensation glass and automatic door-return mechanisms.

Performance

Operating Temperature

-18 °C

Minimum Temp

-25 °C

Maximum Temp

Cooling Technology

Air-cooled, No-frost, Electronic thermostat, Automatic defrost

Design & Build

Door Construction

Three-layer tempered glass with electric heating for anti-condensation

Insulation Thickness

70 mm

Features

Key Operational Features

- Automatic return door mechanism
- Internal LED display lighting
- Bottom-mounted condenser and fan
- Professional-grade compressor
