

Commercial Air Curtain

This high-performance air curtain is designed for industrial and commercial applications. It provides an effective barrier against drafts, dust, insects, and odors, improving indoor air quality and energy efficiency.

Product Overview

High-Performance Air Barrier Solution

This commercial air curtain is engineered for demanding industrial and commercial environments, serving as an effective barrier against drafts, dust, insects, and odors. By maintaining a consistent indoor climate, it significantly enhances energy efficiency and improves overall air quality. Built with robust, durable materials, this unit is designed for long-lasting reliability and minimal maintenance, making it an ideal choice for doorways, loading docks, and high-traffic openings.

Technical Features

Primary Benefits

- Draft prevention
- Dust and insect barrier
- Odor control
- Improved energy efficiency
- Enhanced indoor air quality

Airflow Settings

Adjustable airflow settings for optimal performance

Suitable Applications

Doorways, Loading Docks, Commercial Openings, Industrial Entrances

Construction

Maintenance Requirement

Low Maintenance

Construction Material

Durable industrial-grade materials
