

Commercial Air Curtain with Adjustable Air-flow

This high-performance air curtain is designed for commercial and industrial applications. Adjustable airflow settings allow for customized performance based on environmental conditions, and it is easy to install and maintain, suitable for doorways, entrances, and loading docks.

Product Overview

High-Performance Air Barrier Solution

This industrial-grade air curtain is engineered to provide a robust, consistent air barrier for commercial entrances and loading docks. By effectively preventing the infiltration of dust, insects, and cold drafts, it helps maintain internal climate control and hygiene standards. The unit features an energy-efficient motor and a durable, corrosion-resistant build for long-term reliability in demanding environments.

Technical Specifications

Key Features

- Energy-efficient motor
- Robust construction
- Easy installation
- Low maintenance requirements

Adjustable Airflow	Yes
Surface Finish	Corrosion-resistant
Ideal Applications	Commercial, Industrial, Doorways, Loading Docks
