

# Commercial Air Purifier with HEPA Filter

This air purifier features a HEPA filter with 99.97% efficiency at 0.3um. It removes dust, smoke, and bacteria in large spaces, offering a CADR of 650m3/h and suitability for hospitals, factories, and public venues.

## Product Overview

### High-Performance Air Purification

This high-performance air purifier is engineered to effectively remove airborne contaminants such as dust, pollen, pet dander, mold spores, and other particles from indoor environments. It features a robust multi-stage filtration system, including a pre-filter, HEPA filter, and activated carbon filter, capable of capturing particles as small as 0.3 microns. Designed for versatility and convenience, the unit includes multiple fan speed settings, a timer function, and caster wheels for easy mobility in offices or living spaces.

## Filtration System

### Filtration Stages

- Pre-filter
- HEPA filter
- Activated carbon filter

Minimum Particle Capture	0.3 microns
--------------------------	-------------

## Performance & Features

Fan Speed Settings	Multiple speeds
Timer Function	Yes

## Design & Mobility

### Mobility

Caster wheels

Operation	Quiet operation
-----------	-----------------

## Applications

Suitable Environments	Bedrooms, Living rooms, Offices
