

Commercial Automatic Orange Juice Extractor

This commercial automatic orange juice machine efficiently extracts juice from oranges in high volumes. Its automated process cuts and squeezes oranges, providing fresh juice suitable for restaurants, juice bars, and cafes.

Product Overview

Professional Juice Extraction

This commercial automatic orange juice extractor is engineered for high-volume environments such as restaurants, cafes, and juice bars. Featuring a durable stainless steel construction, it ensures both hygiene and longevity in demanding settings. The automated process efficiently cuts and squeezes fruit, while the transparent juicing chamber offers a clear view of the operation, enhancing the customer experience.

Technical Specifications

Model Number	2000m-2
