

# Commercial Beverage Dispenser with Cooling System

This commercial beverage dispenser is designed to keep drinks chilled and ready to serve. It features a cooling system to maintain optimal serving temperatures and a transparent container for easy monitoring of beverage levels.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Commercial Beverage Dispenser

This commercial beverage dispenser is engineered for high-volume service in restaurants, cafes, and catering environments. It features a robust stainless steel evaporator system that ensures fast, consistent cooling and temperature equilibrium. Designed with energy efficiency in mind, the unit incorporates a closed compressor that minimizes power consumption while maintaining quiet operation.

## Performance & Cooling

### Noise Level

**65 dB**

Maximum Noise

### Cooling System Features

- Surround-type stainless steel evaporator
- Strong and fast refrigeration
- Equilibrium temperature maintenance
- Energy-efficient closed compressor

## Design & Build

### Operational Features

- Stirring mechanism for consistent mixing
- Ventilated cooling system
- Dispensing lever
- Drip tray included

### Construction

Stainless Steel, Transparent Container, Durable Housing
