Product Overview

High-Efficiency Commercial Cold Press Juicer

The ECO-SJ003 is a professional-grade cold press juicer designed for high-volume environments like restaurants and juice bars. Its big-mouth chute allows for processing whole fruits and vegetables, significantly reducing preparation time while the slow juicing technology ensures maximum nutrient retention and juice yield. Built for durability and ease of use, it features a simple one-button operation and versatile filter attachments for both juice and ice cream production.
