

Commercial Chest Freezer with Glass Lids

This chest freezer is designed with a white exterior and stainless steel rim around the glass lids. It includes a temperature control dial and ventilation grills, suitable for commercial or residential settings.

Overview

Commercial Chest Freezer

This commercial chest freezer is designed for high-visibility storage and display, featuring clear glass lids that allow customers to easily view contents. The unit is built with a durable white exterior and stainless steel accents, making it suitable for both commercial retail environments and professional storage needs. Equipped with an adjustable temperature control dial and efficient ventilation, it ensures reliable cooling performance for frozen goods.
