Product Overview

Commercial Cold Beverage Dispenser

This commercial-grade beverage dispenser is designed for high-performance chilling and dispensing in busy environments like restaurants, cafes, and buffets. Featuring food-grade polycarbonate bowls and a robust stainless steel evaporator with a copper coil, it ensures both hygiene and efficient cooling. With its intelligent temperature control and quiet operation, this unit provides a reliable and novel solution for serving chilled beverages consistently.

Key Features

Performance Highlights

- Intelligent temperature control system
- Super cooling technology
- Mute design for quiet operation
- Durable evaporator construction

Materials

Food-grade Polycarbonate, Stainless Steel, Copper Coil

Design & Maintenance

Design Features

Transparent Reservoir • Push-button Dispensing • Removable Drip Tray • Efficient Side Venting
