

# Commercial Cube Ice Production Machine

This industrial ice machine produces cube-shaped ice for commercial use. It features a stainless steel exterior, digital controls, and water inlet/outlet connections for seamless integration.

## Product Overview

### Industrial-Grade Ice Production

This industrial cubic ice machine is engineered for high-volume commercial food service environments. It utilizes premium refrigeration components to ensure high efficiency, energy savings, and low noise operation even during peak summer temperatures. Designed for convenience, the unit features automated controls and is pre-tested before delivery for rapid, seamless installation.

## Operational Features

### Automated Functions

- Automatic start/stop
- Water shortage protection
- Automated troubleshooting
- Ice-full sensor shut-off

### Summer Yield Efficiency

**90 %**

Minimum Summer Yield

## Installation & Maintenance

### Installation Requirements

Pre-installed and tested; requires only water pipe and power connection.

## Construction & Design

### Build Quality

Stainless Steel Exterior, Industrial Grade, Durable, Hygienic Design

### Maintenance Features

Equipped with multiple access doors for ease of inspection and maintenance.
