

Commercial Cube Ice Production Machine

This high-capacity machine efficiently produces large quantities of cube ice for commercial use. Constructed with stainless steel, it features digital controls, an insulated storage bin, and an automatic cleaning function.

Overview

High-Capacity Commercial Ice Production

This high-capacity automatic cube ice making machine is designed for demanding commercial environments, ensuring a consistent and reliable supply of ice. Constructed with durable stainless steel, the unit prioritizes hygiene and long-term operational longevity. It features an intuitive digital control interface for precise monitoring and an insulated storage bin to minimize melting, making it an ideal solution for restaurants, bars, and food service establishments.

Technical Specifications

Power Consumption	2880 W
Electrical Compatibility	220V/110V, 50Hz/60Hz
Refrigerant	R404

Capacity & Storage

Ice Storage Capacity

420 KG

Storage Bin Capacity

Features

Key Features

- Durable stainless steel construction
- Digital control interface
- Insulated storage bin
- Automatic cleaning function
