Product Overview

Professional Dehumidification System

This commercial-grade dehumidification system is engineered for high-capacity moisture removal in large-scale environments. It features precise humidity control and microcomputer-based automation to ensure optimal air quality and equipment protection. With robust construction and versatile drainage options, it provides a reliable solution for warehouses, factories, and commercial spaces requiring consistent humidity management.

Control & Operation

Control Features

- Microcomputer automatic dehumidification
- Large LCD screen display
- Real-time monitoring
- 1-24 hours timer function
- Fault self-test

Humidity Setting Range

20 % Minimum Humidity	90 % Maximum Humidity
---------------------------------	---------------------------------

Adjustment Precision

1% adjustable

Operational Capabilities

Optional Features

High efficiency filtration • Sterilization function

Drainage Options

Continuous drainage, Pumping water (optional)

Design & Build

Construction Details

- Durable white enclosure
- Honeycomb-patterned vent
- Powder-coated steel casing
- Heavy-duty casters for portability
