

# Commercial Dishwasher and Sanitizer

This dishwasher and sanitizer is designed for commercial kitchens. It efficiently washes and disinfects dishes and utensils using multiple racks within a stainless steel frame and behind glass doors.

## Overview

### Professional Sanitizing Solution

This double-door commercial dishwasher and sanitizing apparatus is engineered for high-volume kitchen environments. Featuring a robust stainless steel frame and clear glass doors, it allows for easy monitoring of the cleaning process while maintaining hygiene standards. The unit is equipped with multiple racks, making it versatile for efficiently cleaning and disinfecting various types of kitchenware and utensils.

## Technical Specifications

Voltage	220V
Frequency	50Hz

## Performance Metrics

### Power Consumption Details

<b>500 W</b> Main Heating	<b>350 W</b> Secondary Heating	<b>200 W</b> Wash Pump	<b>100 W</b> Rinse Pump	<b>80 W</b> Control System	<b>10 W</b> Indicator/Auxiliary
