

Commercial Double Door Display Refrigerator

This double-door refrigerator is designed for commercial display purposes. It features adjustable shelves, internal fan for even cooling, and temperature control.

Overview

Professional Commercial Refrigeration

This double-door display refrigerator is engineered for optimal retail performance, offering clear visibility and efficient cooling for beverages and perishable food items. It features high-quality glass doors, bright internal illumination, and a robust bottom-mounted compressor system to maintain consistent temperatures. Designed to prioritize product freshness, it provides an ideal solution for supermarkets, convenience stores, and specialized retail environments.

Performance & Features

Key Technical Features

- Double glass door design for maximum product visibility
- Adjustable shelving system for flexible storage configurations
- Internal ventilation system for uniform cooling distribution
- Integrated high-brightness interior lighting
- Precision temperature control interface

Design & Construction

Construction Highlights

Glass Door, Bottom-Mounted Compressor, Adjustable Shelves, Commercial Grade

Usage

Ideal For

Retail Stores • Beverage Displays • Food Merchandising
