

Commercial Electric Baking Oven

This commercial-grade electric oven is constructed with durable stainless steel. It features adjustable temperature controls, a timer function, and a viewing window for monitoring cooking progress.

Product Overview

Professional Baking Solution

This commercial-grade electric baking oven is constructed with a durable stainless steel body, designed to meet rigorous food sanitation standards while maintaining a sleek, professional appearance. Engineered for reliability, it features thick, high-quality interior plates that prevent deformation during extended operation. With advanced features like independent upper and lower temperature control and an automated buzzer alarm system, this oven ensures consistent, high-quality results for bakeshops, supermarkets, and commercial kitchens.

Technical Specifications

Safety Features

- Over-temperature safety protection
- Automatic heating stop
- Buzzer alarm upon timer completion

Max Temperature	300 °C
Control System	Digital Temperature Control, Knob-type Timer, Independent Up/Down Thermostat

Construction & Design

Construction

Stainless Steel Body • Thick Interior Plates • Double Glass Viewing Window

Insulation	Increased thickness for fast heating and energy efficiency
Lighting	Yes

Usage & Applications

Recommended Settings	Bakeshops, Shopping Malls, Supermarkets
