

Commercial Electric Range with Oven

This commercial electric range features four heating elements and an oven. It is constructed from stainless steel and designed for heavy-duty use in commercial kitchens.

Product Overview

Professional Performance

This commercial electric range is engineered for heavy-duty use in demanding environments like restaurants and catering services. Featuring four high-performance heating elements and an integrated oven, it offers versatile cooking capabilities in a single, compact footprint. Constructed from durable stainless steel, this appliance ensures longevity and easy maintenance for busy food service establishments.
