

Commercial Food Processing Machine for Vegetables and Fruits

This heavy-duty commercial food processing machine is designed for high-volume slicing, dicing, and shredding of vegetables and fruits. Constructed from stainless steel, it ensures durability and hygiene.

Overview

Professional Food Processing Solution

This heavy-duty commercial food processing machine is engineered for high-volume slicing, dicing, and shredding of a wide variety of vegetables and fruits. Constructed from durable, high-grade stainless steel, it is built to meet rigorous hygiene and performance standards in demanding environments. Designed to streamline food preparation, this machine is an essential asset for restaurants, catering services, and large-scale food processing facilities looking to maximize efficiency.

Technical Specifications

Design Features

- Cylindrical feeding chute
- Rotating cutting disc
- Adjustable cut size settings

Material	Stainless Steel
Processing Functions	Slicing, Dicing, Shredding

Usage

Ideal For

Restaurants • Catering Services • Food Processing Plants
