

Commercial Fuel Dispenser

This fuel dispenser is designed for commercial use, dispensing both gasoline and diesel fuels. It features an electronic display showing sale amount, liters dispensed, and price per unit.

Product Overview

Commercial Fuel Dispenser Solution

This high-performance commercial fuel dispenser is engineered for reliability and precision in demanding retail environments. Featuring a dual-sided configuration, it provides seamless service for both gasoline and diesel fuels. Its robust housing ensures long-term durability, while the clear electronic display keeps both operators and customers informed with real-time data on sales volume, fuel quantity, and pricing.
