Product Overview

Professional Display Solution

This commercial glass door display freezer is engineered for high-performance food service environments, including restaurants, convenience stores, and cafeterias. Featuring a robust stainless steel construction and forced air-cooled circulation, it ensures optimal temperature stability for large volumes of ingredients. The unit integrates intelligent digital temperature control and an automatic defrost system, combining energy efficiency with ease of maintenance for demanding retail and catering applications.

Technical Specifications

Build Materials

- High-quality stainless steel cabinet
- High-pressure polyurethane foam door insulation
- Corrosion-resistant polyurethane-treated evaporator coils

Cooling Technology

Forced air-cooled circulation, Automatic defrost system, Intelligent microcomputer control

Insulation Material

High-density cyclopentane polyurethane

Performance Features

Key Operational Benefits

Low noise operation • Energy efficient • Easy to clean • Removable door seal

Maintenance Efficiency

1 Optimized

Defrost Cycle
