

Commercial Ice Blending Machine

This high-performance commercial blender is designed for creating ice sand and other blended beverages. It features a powerful motor, variable speed control with low to high settings, and a pulse function for precise blending.

Product Overview

Professional Commercial Ice Blender

This high-performance commercial blender is engineered for rapid icing and versatile food processing, making it an essential tool for restaurants, bars, and cafes. It features a high-strength, durable container capable of withstanding extreme temperature fluctuations. Designed for precision and ease of use, it offers variable speed controls and a pulse function to ensure consistent results for both dry and wet ingredients.
