

Commercial Ice Cube Production Machine

This industrial ice cube machine is designed for large-scale ice production. It features a stainless steel exterior for hygiene and durability, with a digital control panel for precise temperature and ice-making settings.

Product Overview

Industrial-Grade Ice Production

This industrial ice cube machine is engineered specifically for high-demand food service environments. It utilizes world-class refrigeration components to ensure maximum efficiency, energy savings, and low-noise operation. With advanced automated features and a robust design, it provides a consistent, reliable ice supply even during peak summer temperatures.

Performance & Features

Summer Yield Efficiency

90 %

Summer Yield

Key Operational Features

- Automatic start and stop functionality
- Water shortage protection
- Automatic ice-full detection
- Built-in troubleshooting system

Installation & Maintenance

Installation Requirements

Pre-tested at the factory; requires only connection to water supply and power source.
